1. About the Organization

Amazon is guided by four principles: customer obsession rather than competitor focus, passion for invention, commitment to operational excellence, and long-term thinking.

2. Key Roles & Responsibilities

- Own end-to-end design and delivery of mission-critical e-commerce & fulfillment microservices.
- Solve complex scalability bottlenecks handling millions of transactional events per second.
- Champion automated unit and integration tests with continuous deployment pipelines.
- Work alongside Product Managers and Principal Engineers to refine functional requirements.

3. Technical Requirements & Qualifications

- Strong command of Object-Oriented Programming (Java, C++, Python).
- Deep comprehension of Algorithm Design, Complexity, Multi-threading, and Database Indices.
- Familiarity with distributed caching, queues (Kafka, SQS), and asynchronous workflows.
- Alignment with Amazon's 16 Leadership Principles.

4. Selection & Interview Process

Step 1: Round 1: Amazon Online Assessment (OA) - Coding & Work Simulation

Step 2: Round 2: Technical Interview I (Data Structures & Algorithmic Optimizations)

Step 3: Round 3: Technical Interview II (Object-Oriented Design & CS Fundamentals)

Step 4: Round 4: Bar Raiser & Behavioral Leadership Evaluation
