1. About the Organization

CrowdStrike is a global cybersecurity leader that has redefined modern security with one of the world's most advanced cloud-native platforms, the Falcon platform.

2. Key Roles & Responsibilities

- Track nation-state threat actors, targeted intrusion sets, and cybercrime syndicates.
- Analyze and reverse-engineer malicious payloads, scripts, and dropper binaries.
- Author actionable threat intelligence reports and YARA/Sigma detection signatures.
- Work closely with Falcon sensor teams to deploy real-time behavioral prevention policies.

3. Technical Requirements & Qualifications

- Strong understanding of Windows/Linux OS internals and malware persistence mechanisms.
- Knowledge of disassemblers/decompilers (Ghidra, IDA Pro, x64dbg).
- Proficiency in Python for automation and payload extraction.
- Familiarity with MITRE ATT&CK; framework and threat intelligence models.

4. Selection & Interview Process

Step 1: Round 1: Cyber Security & Scripting Assessment

Step 2: Round 2: Technical Interview I (Malware Analysis, OS Internals & Networking)

Step 3: Round 3: Technical Interview II (Threat Actor Profiling & Detection Engineering)

Step 4: Round 4: Leadership & Behavioral Interview
