

Texas Instruments

Position: Hardware & Embedded Systems Trainee

Compensation (CTC):	■ 11.0 LPA	Job ID:	TI-HW-TRAINEE-2027
Job Location:	Bengaluru, Karnataka, India	Drive Status:	DRIVE_COMPLETED (Approved)
Eligibility:	ECE, Electrical & Electronics (Min 75% aggregate)	Official Careers:	https://ti.com/careers
Contact Email:	india-campus@ti.com	Contact Phone:	+91 80 2509 9000

1. About the Organization

Texas Instruments designs and manufactures semiconductors and various integrated circuits, which it sells to electronics designers and manufacturers globally.

2. Key Roles & Responsibilities

- Design and test analog, digital, and mixed-signal circuit schematics and PCB layouts.
- Develop bare-metal firmware drivers for TI microcontrollers (MSP430, C2000, SimpleLink).
- Perform laboratory bench validation, signal integrity checks, and thermal characterization.
- Collaborate with application teams to author hardware design notes and user guides.

3. Technical Requirements & Qualifications

- Strong foundation in Analog Circuits, Digital Logic Design, and Signal Processing.
- Proficiency in Embedded C and hardware description languages (Verilog/VHDL).
- Hands-on experience with PCB CAD tools (Altium, KiCad) and lab test equipment.
- Problem-solving acumen and passion for semiconductor technology.

4. Selection & Interview Process

Step 1: Round 1: Online Technical Test (Analog/Digital Design & Basic C)

Step 2: Round 2: Technical Interview I (Circuit Analysis, RLC circuits, MOSFETs, Op-Amps)

Step 3: Round 3: Technical Interview II (Microcontroller Architecture & Embedded Coding)

Step 4: Round 4: HR & Behavioral Round
