1. About the Organization

TCS is an IT services, consulting, and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for over 50 years.

2. Key Roles & Responsibilities

- Engineer scalable cloud-native microservices and responsive web platforms.
- Integrate automated continuous integration pipelines with enterprise cloud providers.
- Develop AI/ML workflow models and automated data ingestion ETL pipelines.
- Collaborate with international client teams in rapid Agile sprint cycles.

3. Technical Requirements & Qualifications

- Proficiency in Java, Python, C++, or Node.js.
- Strong understanding of RDBMS, NoSQL data stores, and RESTful APIs.
- Basic knowledge of Cloud platforms (AWS, Azure, GCP) and Git version control.
- Good team spirit, problem-solving mindset, and learning agility.

4. Selection & Interview Process

- Step 1:** Round 1: TCS National Qualifier Test (NQT) - Digital Track (Advanced Coding & Logic)
- Step 2:** Round 2: Technical Interview (Core Computer Science & Project Defense)
- Step 3:** Round 3: Managerial Assessment
- Step 4:** Round 4: HR Interview
